

STAT:2010/4200, Statistical Methods and Computing
Spring 2016
Instructor: Cowles
Information on Final Exam

- The final exam will be given
Thu 5/12/2016
5:30 PM - 7:30 PM
LR2 VAN (Lecture room 2, Van Allen Hall)
- Please leave an empty seat between students. There is room in the exam room to do that.
- The final is cumulative. All material mentioned in the descriptions of the midterms could also appear on the final.
- There definitely will be questions on material covered since Midterm 3. This includes inference for regression.
- Questions will be mostly short answer and multiple choice. Some will involve interpreting SAS output that I will provide.
- You may bring:
 - up to four 8-1/2 x 11 sheets of paper with your own notes (the three from your midterms, plus one more)
 - the normal, t, and chi square tables from your textbook
 - a calculator
- Short answer questions and interpretation of computer output will be similar in style to homework problems. Doing unassigned textbook problems would be an excellent way to prepare for the exam.
