

STAT:2010/4200, Statistical Methods and Computing  
Spring 2017  
Instructors: Cowles  
Information on Midterm 2

- Midterm 2 will be given Fri. 03/31. Most students will take it at 11:30 in room 40 SH or room 22 SH. Those who cannot take it at 11:30 will take it at 12:30 in room 30 SH.
- It will cover the following portions of the textbook and class material:
  - Chapters 9-12, 14-18
  - material covered in class through lecture 16 and lab 6 (Sections 1 and 3 of lab 6, not Section 2)
  - homework through homework 8
- Questions will be mostly short answer and multiple choice. Some will involve interpreting SAS output that I will provide.
- You may bring:
  - one 8-1/2 x 11 sheet of paper with your own notes.
  - the **random digit, normal, and t tables** from your textbook
  - a calculator
- Short answer questions and interpretation of computer output will be similar in style to homework problems. Doing the practice problems and unassigned textbook problems would be an excellent way to prepare for the exam.
