

STAT:2010/4200, Statistical Methods and Computing
Spring 2019
Instructor: Cowles
Information on Final Exam

- The final exam will be given
Wed 05/08/2019
5:30PM - 7:30PM
LR2, VAN (that is, Lecture room 2 in Van Allen)
- Please leave an empty seat between students. There is room in the exam room to do that.
- Material covered since midterm 3 (namely, nonparametric tests) definitely will appear on the final.
- The final also is cumulative. All material mentioned in the descriptions of the midterms could also appear on the final. Topics that didn't appear on the midterms are especially likely to be on the final.
- Questions will be mostly short answer and multiple choice. Some will involve interpreting SAS output that I will provide.
- You may bring:
 - up to four 8-1/2 x 11 sheets of paper with your own notes (the three from your midterms, plus one more)
 - the normal, t, and chi square tables from your textbook
 - a calculator
- Short answer questions and interpretation of computer output will be similar in style to homework problems. Doing unassigned textbook problems would be an excellent way to prepare for the exam.
