

STAT 5400 Fall 2016
Instructor: Cowles
Homework 3

See reading assignment under Web Resources on course web page.

Problems (due Fri. 9/16):

1. Problems from the online book called Using R for Data Analysis and Graphics by Maindonald (under Web Resources):

problem 5, p. 20

problem 2, p. 30

2. all the problems on p. 61 (you don't have to turn these in; just do them on your own)

Submit your homework electronically through ICON by Fri. 09/18 in the form of a text file containing all of your R code and the text output. For now, you may just describe any graphical output that you produce. (We will learn during the week of 9/15 how to embed R code, output, and graphics into \LaTeX documents, but you don't need to do that for this homework!)
