The final exam will be given Tues., 5/10, 9:45 - 11:45 a.m., in 107 EPB.

Prof Cowles’s office hours during final exam week are:
- Mon. 11:00 - 12:20

New material that can appear on the final is on nonparametric tests in the following chapter of the textbook:
- Chapter 23 (available on textbook web page)

The final is cumulative. All material mentioned in the descriptions of the midterms could also appear on the final.

Questions will be mostly short answer and multiple choice. Some will involve interpreting SAS output that I will provide.

You may bring:
- four 8-1/2 x 11 sheets of paper with your own notes.
- the orange tables from your textbook
- a calculator

Short answer questions and interpretation of computer output will be similar in style to homework problems. Doing unassigned textbook problems would be an excellent way to prepare for the exam.
