22S:30/105, Statistical Methods and Computing
Spring 2006
Instructor: Cowles
Information on Midterm 2

- Midterm 2 will be given Wed. 3/29 in class.

- It will cover the following portions of the textbook and class material:

  - Chapters 9, 10 (omit Statistical process control), 13-15, 16 (through p. 419) in the textbook
  - material covered in class through 3/20 lecture and 3/22 lab

- Questions will be mostly short answer and multiple choice. Some will involve interpreting SAS output that I will provide.

- You may bring:

  - one 8-1/2 x 11 sheet of paper with your own notes.
  - the orange tables from your textbook
  - a calculator

- Short answer questions and interpretation of computer output will be similar in style to homework problems. Doing the practice problems and unassigned textbook problems would be an excellent way to prepare for the exam.
