• The final exam will be given Tues., 5/12, at noon, in the regular classroom.

• Prof Cowles’s extra office hours are:
  – Mon. 05/11 11:00 - 12:30

• New material that can appear on the final is:
  – Chapter 21 Inference in regression
  – Chapter 26 Nonparametric tests

• The final is cumulative. All material mentioned in the descriptions of the midterms could also appear on the final.

• Questions will be mostly short answer and multiple choice. Some will involve interpreting SAS output that I will provide.

• You may bring:
  – four 8-1/2 x 11 sheets of paper with your own notes.
  – the normal, t, chi square, and random digit tables from your textbook
  – a calculator

• Short answer questions and interpretation of computer output will be similar in style to homework problems. Doing unassigned textbook problems would be an excellent way to prepare for the exam.
