Q6 - For any areas above you were either not at all satisfied or somewhat satisfied, please explain how they could be improved.

At the moment I do not use mapping class groups, and I have a hard time learning things unless I am in active need of it. Unless it is at a very easy level.

Q7 - Overall Experience Please rate your level of agreement or disagreement with the following statements (response required):

Q9 - What is one thing you would change about the course? How would you change it?

Group presentations. Instead of two people doing a separate presentation have two people present two sections. Might help with talks being more consistent.

Slow down so we could go through all material in each section

I would not change anything.

None

Some motivating questions would be helpful.

Have presenters send notes to organizers, and circulate the notes among the RTG. Maybe not publicly, if that would make people uncomfortable, but at least internally. This has the added benefit of "coercing" the presenters have organized thoughts and structure, which I think would have helped a few of them.

I think having a weekly seminar was slightly stressful during midterms, but also it was very informative, so I don't necessarily think it's something to change.

Q10 - What other comments would you like to share with us?

Thanks for doing this

I had a great time doing this research and it has already provided me with new opportunities as for jobs.
