Other - Text

My project was a reading project which didn't have a firm result or end product so it is hard for me to say.

For any areas above you were either not at all satisfied or somewhat satisfied, please explain how they could be improved.
Being the test audience for this textbook was a little frustrating, and I think the seminar could have moved faster had we chosen a different text.

Q7 - What is one thing you would change about the course? How would you change it?

It would have been nice to all meet at the same time, but this was an unavoidable problem of scheduling. Otherwise I really enjoyed it!
As I said previously, I would have chosen a different textbook which we didn't need to proof read while reading for content.

Q8 - Are there specific topics in Geometry and Topology you want to explore in a future undergraduate seminar?

| Algebraic Topology |
| Seifert Surfaces? |
| I think a seminar on algebraic geometry would be very cool. |

Q9 - What other comments would you like to share with us?

| What other comments would you like to share with us? |

| I just realized that you meant for Nicholas Cecil to take the surveys for the graduate seminars instead of me- sorry I submitted a response. I was a little confused about that. I gave full marks for the choices though, so I shouldn't have hurt the evaluation. |
| I'm glad I participated in this seminar. |
